

1Q19 EARNINGS CONFERENCE CALL

MAY 9, 2019

Basis of Presentation

This presentation presents historical results, for the periods presented, of Tradeweb Markets LLC, the predecessor of Tradeweb Markets Inc. for financial reporting purposes (together with Tradeweb Markets Inc., referred to as “Tradeweb,” “Tradeweb Markets” or the “Company”). The financial results of Tradeweb Markets Inc. have not been included in this presentation as it is a newly incorporated entity and had no material assets or liabilities and no material business transactions or activities during the periods presented. Accordingly, these historical results do not purport to reflect what the results of operations of Tradeweb Markets Inc. would have been had our IPO and related transactions occurred prior to such periods. For example, these historical results do not reflect the attribution of net income to non-controlling interests or the provision for corporate income taxes on the income attributable to Tradeweb Markets Inc. that we expect to recognize in future periods.

On October 1, 2018, Refinitiv Holdings Ltd. (“Refinitiv”), which is controlled by certain investment funds affiliated with The Blackstone Group L.P., an affiliate of Canada Pension Plan Investment Board, an affiliate of GIC Special Investments Pte. Ltd. and certain co-investors, indirectly acquired substantially all of the financial and risk business of Thomson Reuters Corporation and Thomson Reuters Corporation indirectly acquired a non-controlling ownership interest in Refinitiv (collectively, the “Refinitiv Transaction”). As a result of the Refinitiv Transaction, as a consolidating subsidiary of Refinitiv, we accounted for the Refinitiv Transaction using pushdown accounting. Due to the change in the basis of accounting resulting from the application of pushdown accounting, the financial information for the period beginning on October 1, 2018, and through and including March 31, 2019, or the successor period, and the financial information for the periods prior to, and including, September 30, 2018, or the predecessor period, are not necessarily comparable. Please note, however, that the change in basis resulting from the Refinitiv Transaction did not impact certain financial information, specifically revenues and certain expenses.

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the federal securities laws. Statements related to, among other things, our guidance, including guidance for 2019, and future performance, the markets in which we operate, our expectations, beliefs, plans, strategies, objectives, prospects and assumptions and future events are forward-looking statements.

We have based these forward-looking statements on our current expectations, assumptions, estimates and projections. While we believe these expectations, assumptions, estimates and projections are reasonable, such forward-looking statements are only predictions and involve known and unknown risks and uncertainties, many of which are beyond our control. These and other important factors, including those discussed under the heading “Risk Factors” in our prospectus filed with the SEC on April 5, 2019 and other documents of Tradeweb Markets Inc. on file with or furnished to the SEC, may cause our actual results, performance or achievements to differ materially from those expressed or implied by these forward-looking statements. Given these risks and uncertainties, you are cautioned not to place undue reliance on such forward-looking statements. The forward-looking statements contained in this presentation are not guarantees of future performance and our actual results of operations, financial condition and liquidity, and the development of the markets in which we operate, may differ materially from the forward-looking statements contained in this presentation. In addition, even if our results of operations, financial condition, and liquidity, and events in the markets in which we operate, are consistent with the forward-looking statements contained in this presentation, they may not be predictive of results or developments in future periods.

Any forward-looking statement that we make in this presentation speaks only as of the date of such statement. Except as required by law, we do not undertake any obligation to update or revise, or to publicly announce any update or revision to, any of the forward-looking statements, whether as a result of new information, future events or otherwise, after the date of this presentation.

Non-GAAP Financial Measures

This presentation contains “non-GAAP financial measures,” including Adjusted EBITDA, Adjusted EBITDA margin, Adjusted EBIT, Adjusted EBIT margin, Adjusted EBT, Adjusted Net Income, Adjusted Net Income per diluted share (“Adjusted Diluted EPS”), Free Cash Flow and Adjusted Expenses, which are financial measures that are not calculated and presented in accordance with GAAP. We make use of non-GAAP financial measures in evaluating our past results and future prospects. We present these non-GAAP financial measures because we believe they assist investors and analysts in comparing our operating performance across reporting periods on a consistent basis by excluding items that we do not believe are indicative of our core operating performance.

In addition, we present certain growth information on a “constant currency” basis. In countries with currencies other than the U.S. dollar, revenues and expenses are translated using monthly average exchange rates. Certain discussions in this presentation isolate the impact of period-over-period foreign currency fluctuations to better measure the comparability of operating results between periods. Operating results excluding the impact of foreign currency fluctuations are calculated by translating the current period’s results using the prior period’s exchange rates.

See “Appendix” for reconciliations of the non-GAAP financial measures contained in this presentation to their most comparable GAAP financial measure.

Non-GAAP financial measures have limitations as analytical tools, and you should not consider these non-GAAP financial measures in isolation or as alternatives to net income, net income per diluted share (“Diluted EPS”), operating income, operating expenses, cash flow from operating activities or any other financial measure derived in accordance with GAAP. You are encouraged to evaluate each adjustment included in the reconciliations. In addition, in evaluating Adjusted EBITDA, Adjusted EBITDA margin, Adjusted Net Income, Adjusted EPS, Free Cash Flow and Adjusted Expenses, you should be aware that in the future, we may incur expenses similar to the adjustments in the presentations of these non-GAAP financial measures. Our presentation of non-GAAP financial measures should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items. In addition, the non-GAAP financial measures contained in this presentation may not be comparable to similarly titled measures used by other companies in our industry or across different industries.

Tradeweb Social Media

Investors and others should note that Tradeweb Markets announces material financial and operational information using its investor relations website, press releases, SEC filings and public conference calls and webcasts. Information about Tradeweb Markets, its business, and its results of operations may also be announced by posts on the Company’s accounts on the following social media channels: Instagram, LinkedIn and Twitter. The information that we post through these social media channels may be deemed material. As a result, we encourage investors, the media, and others interested in Tradeweb Markets to monitor these social media channels in addition to following our press releases, SEC filings and public conference calls and webcasts. These social media channels may be updated from time to time on our investor relations website.

The pro forma fully diluted weighted average shares outstanding and assumed share prices provided in the table above give effect to the IPO and the reorganization transactions completed in connection therewith, are being provided for illustrative purposes only and do not purport to represent what fully diluted weighted averages shares outstanding or our share price may be for any future period. The trading price of our Class A common stock could be volatile, and there can be no guarantee that actual trading prices will be at or above the assumed prices provided in the table above.

Pro forma fully diluted weighted average shares outstanding is computed by adjusting the weighted average shares of Class A and Class B common stock outstanding to give effect to potentially dilutive securities, including outstanding common membership units of Tradeweb Markets LLC ("LLC Interests") and certain shares of Class A common stock underlying outstanding options and modified PRSU awards using the treasury stock method. The weighted average share calculation assumes outstanding LLC Interests were exchanged for shares of Class A or Class B common stock at the beginning of the applicable period. This adjustment is made for purposes of calculating pro forma fully diluted weighted average shares outstanding only and does not necessarily reflect the amount of exchanges that may occur in the future. The weighted average share calculation also assumes that certain options were issued and outstanding at the beginning of the period and modified PRSU awards were issued and outstanding on the last day of the period.
